

Palazzo | tile + stone

Timeless Luxury

Perlino Crema Limestone, renowned for its warm beige hues complemented by deeper shades, is a versatile stone that can elevate a multitude of design projects. The intermingling of the warm beige foundation with the darker shades results in a well-balanced and textured aesthetic that captivates attention without overwhelming the space.

Perlino Crema Limestone maintains a fair degree of uniformity, offering consistency from tile to tile. It may exhibit occasional small, randomly placed brown or black spots. With a light cream base and slightly darker cream mottling, Perlino Crema Limestone presents a timeless appearance.
